Comment : NO NO NO PLEASE. I have a 11+ hour trip every couple of months to Europe and having to listen to other people's conversations while in the air would drive me mad. Even on the bus ride to work, the girl chatting on the phone next to me is annoying, and that is only for 20 minutes.

I am a business traveller, and what would be EXTREMELY helpful is to have wireless internet access on board. Then instant messaging can be used for 'talking' to people.

If we were to get internet access, then we would need to enforce a noise restriction on the keyboards because I don't want some guy sitting next to me banging away on an old springy keyboard.

Thanks for considering my opinion.

Emile
